# Rainshower AQUA Ceiling Showers

Rainshower AQUA Ceiling Showers is a modular shower system. The flush-mounted modules can be exchanged, extended and individually combined to create a unique ceiling shower. The modules also give users the option to create flexible arrangements: thanks to their angular form and different lengths, they can be arranged vertically, horizontally, asymmetrically and even around corners. With their reduced, clear language of form, Rainshower AQUA Ceiling Showers embody a stylish addition to modern bathrooms.
